

# Sourceforge

These are my open-source projects registered at [Sourceforge](#):

**[gerber2eps](#)**

Converts Gerber format to EPS (Encapsulated Postscript).

**[chesstask](#)**

Create sets of chess tasks and output them to LaTeX or HTML.

**[pgn2ltx](#)**

Convert PGN (Portable Game Notation, files with chess games) to LaTeX.

**[fen2eps](#)**

Output nice looking chess boards in EPS from FEN files (Forsyth Edwards Notation for chess positions).

**[sPYderchess](#)**

A framework for analysing your chess games, written in Python.
